Application/Control Number: 10/648,022

Art Unit: 2816

1. The RCE and amendments filed on 6/6/05 have been received and entered in the case.

- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 3. Claims 1, 2, 6-11, 13-15, 18 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Crampton.

See paragraph three of the office action mailed on 3/8/05 for the details of this rejection. As to the new limitation that the feedforward capacitor is coupled to a source and gate of the shunt FET, note that capacitor 84 has one side directly connected to the source of FET 80 (as in applicant's invention), and the other side connected to the gate of FET 80 through a resistor (as in applicant's invention).

4. Applicant's arguments filed on 6/6/05 have been fully considered but they are not persuasive.

The argument that Crampton does not "disclose, teach or suggest a first control voltage applied to the signal line connecting the RF input 58 to the RF output 70" is not persuasive because it is incorrect, i.e., this control voltage is "RF IN" in Fig. 5 of Crampton.

Application/Control Number: 10/648,022

Page 3

Art Unit: 2816

The further argument that Crampton does not teach the recited feedforward capacitor is also incorrect, i.e., as noted in paragraph three above, capacitor 84 is a "feedforward capacitor" in the same manner as applicant's feedforward capacitor (because it is connected in the same manner). It is noted that applicant has not explained how or why capacitor 48 of instant Fig. 3 functions as a "feedforward capacitor", whereas capacitor 84 of Crampton does not. Since all the electrical connections are the same, the function will be the same too.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth B. Wells whose telephone number is (571)272-1757. The examiner can normally be reached on Monday through Friday from 8:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy P. Callahan, can be reached at (571)272-1740. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval
